A: IMPORTANCE AND SCOPE OF COMPUTER SCIENCE :-

Scope can vary from as little as a single expression to as much as the entire program, with many possible gradations in between. The simplest scoping rule is global scope – all entities are visible throughout the entire program. The most basic modular scoping rule is two-level scoping, with a global scope anywhere in the program, and local scope within a function. More sophisticated modular programming allows a separate module scope, where names are visible within the module (private to the module) but not visible outside it. Within a function, some languages, such as C, allow block scope to restrict scope to a subset of a function; others, notably functional languages, allow expression scope, to restrict scope to a single expression. Other scopes include file scope (notably in C), which functions similarly to module scope, and block scope outside of functions (notably in Perl).

A subtle issue is exactly when a scope begins and ends. In some languages, such as in C, a scope starts at declaration, and thus different names declared within a given block can have different scopes. This requires declaring functions before use, though not necessarily defining them, and requires <u>forward declaration</u> in some cases, notably for mutual recursion. In other languages, such as JavaScript or Python, a name's scope begins at the start of the relevant block (such as the start of a function), regardless of where it is defined, and all names within a given block have the same scope; in JavaScript this is known as *variable hoisting*. However, when the name is bound to a value varies, and behavior of in-context names that have undefined value differs: in Python use of undefined variables yields a runtime error, while in JavaScript undefined variables are usable (with undefined value), but function declarations are also hoisted to the top of the containing function and usable throughout the function.

About the Institution: The Marathwada region was under the influence of the Nizam of Hyderabad and the people were ignored. Later on, in accordance with the linguistic policies, Maharashtra was separated and in 1959, the Marathwada Shikshan Prasarak Mandal was established at Aurangabad, the central place of the Marathwada, which was possible due to the dedicated involvement of visionaris Mr. V. R. Sawant and Mr. Vinayakrao Patil. The base of the establishment was and is still the same, to provide knowledge to the poor and ignorant. The motto "Duritanche timir jawo", "let the darkness of ignorance be driven away", is the foundation of the institution. Following the motto and its mission, the foundation lead the path of progress for the society in the region with numerous colleges, schools and various types of career oriented courses offered in them.

About the College : Yeshwantrao Chavan College was established in June 1972. As soon as the Department of Under Graduate Studies in Hindi (Language & Literature) was established at the same time and started catering education to first year students of Arts, commerce & science through Second Language & Optional Subjects.

Best Practices of the Department :

- Department of Organized Poster Presentation

- Conducting the Weakly test in Computer Science

- Department Organizing Student Seminars and Workshop

- Question Bank Provide for Student

f: DEPARTMENT OBJECTIVES TO BE IDENTIFIED:

Our college is run by Marathawada Shikshan Prasarak Mandal, Aurangabad. This institution is one of the oldest and the biggest institution of Marathawada region. The department of Home Science is committed to Institunal Motto, Vision & Mission.

- ➤ To provide scientific knowledge
- ➤ To aware parental education
- ➤ To increase over all development
- ➤ To increase social development
- ➤ To create health Awareness.
- ➤ To aware about vocational education.
