Department of Music

A: IMPORTANCE AND SCOPE OF MUSIC :-

In all levels of education, music has immense worth. Students learn many important and necessary values for life as music enhances their mind, their expressive ability, and a whole host of other qualities. Learning to read music is learning a different language with abstract sonic meaning. One not only has to comprehend and decipher unique symbols on a page, they have to know how to execute them and execute them well. Those learning music also learn how to develop a critical ear. With a critical ear, one will know how to practice, rehearse, analyze, and critique music performance. Also, performing music encompasses playing with others, as well as alone, which both necessitate certain skills. Also one can also learn tremendously from studying and analyzing music, composing, reading about music, understanding the history of music and its association with historical and current trends, and knowing what to listen for in music. Students of music – whether it be at the elementary, middle school, high school, collegiate level, or through self-study – learn self-discipline, expression through sound, enhance technical motor skills, further develop problem solving skills, learn how to cooperate and collaborate with others, and learn how to ignite the creative and critical mind. Most importantly, the student can come away understanding that music offers all those qualities in addition to the enjoyment in listening casually or with great attention. Anyone who is educated in music learns these skills whether they know it or not. People who do not make a career in music but have studied it will take these skills and apply it to their everyday lives and career.

B: INTRODUCTION OF DEPARTMENT:

Introduction :

Home Science education in India has been started since 1923 on words. It is interdisciplinary Science with wide coverage of subjects of many of them are useful for all round development of women as well as men.

Recently Home Science education is gaining importance as many of student are opting them as their career choice . In Home Science education variety of subjects & topics are covered and women can become confident and planning important role by decision making & independently doing efforts to take challenges in all sorts of activities.

Home Science is the application of many science and arts towards achieving heal there & happier homes in the society and ultimately the nation. Home Science is multidimensional Subject.

In the Society there is not clear idea about Home Science. If you ask anybody that what he / she understand by the term Home Science his / her answer most likely is that it is a subject deals with household chores & only home making activities & it is meant only for girls. This is often and common misconception about Home Science.
