## BRIDGE COURSE

The bridge course of Sociology department was organized for the first year B.A. Students during the month of July in first week. The organizer and convener of the course was Dr. Sanjay G. Surewad, the other conveners for the course were Dr. Rohini V. Khanadare. The basic aim behind organizing this two day's workshop was giving preliminary orientation of the subject to especially those students of First year B.A. who did not have Sociology as one of the subjects in their 11<sup>th</sup> and 12<sup>th</sup> and who are going to study the subject for the first time. It is also believed that when students join any degree course such as B.A. after completing their two years of Junior College, they are expected to have some specific academic skills that are required in their degree course and which they have not learnt before. So they might experience some kind of gap experience some kind of gap especially with respect to these skills. Through this bridge Course we hope to also give them some basic orientation about these academic skills especially in order to bridge the gap both in terms of the subject content and academic skills.

### Objectives of the Event

1. The main objective of the course is to bridge the gap that students from different disciplines, also from sociological background, face in their undergraduate degree program.
2. The Course introduce the understand
  - i. How sociology came into existence?
  - ii. How the development of sociology happened?
  - iii. What is the sociology that we study today?
  - iv. What are the different courses that will be studied in the degree course?
  - v. What activities does the department run?
  - vi. And lastly we have the various career opportunities for the students in the field of Sociology?

## Syllabus of the Course:-

1. Origin and Development of Sociology as a discipline.
2. Reading. Writing and listening as important academic skills.
3. Significance of Studying Sociology and various career opportunities in Sociology

## **Bridge Course (Academic year: 2023 to 2024)**

### **Basic fundamental Principal of Public Administration**

#### **Intoduction:-**

The bridge course of Public Administration department is organized for the first year B.A. Students during the month of July in first week. The syllabus of this bridge course is completed in 10 hours. The basic aim behind organizing this course is giving preliminary orientation of the subject to especially those students of First year B.A. who did not have Public Administration as one of the subjects in their 11<sup>th</sup> and 12<sup>th</sup> and who are going to study the subject for the first time. It is also believed that when students join any degree course such as B.A. after completing their two years of junior College, they are expected to have some specific academic skills that are required in their degree course and which they have not learnt before. So they might experience some kind of gap experience some kind of gap especially with respect to these skills. Through this bridge Course we hope to also give them some basic orientation about these academic skills especially in order to bridge the gap both in terms of the subject content and academic skills.

Public Administration is an independent branch of study in the social science, it has recent origin. Traditionally Public administration was considered as a part of Political Science. But modern age the nature of state has changed as service state from bureaucratic state. It has an important role in the formulation of public policy at all levels, from national to grassroots. Students while studying any subject, it is necessary to know its background.

#### **Objectives of the Event:**

1. The main objective of the course is to bridge the gap that students from different disciplines, also from Public Administrational background, face in their undergraduate degree program
2. Introducing the subject to the first year students.
3. Acknowledging the students an opportunity after studying the subject.

1. Aims :

This course is specially designed for the students who are disconnected with the subject of chemistry. An introductory orientation of the subject will help in creating interest and clear their basic concepts of subject. These sessions will help in better understanding of the core of the subject. Expert faculties not only from neighboring colleges but also from neighboring university were invited to guide the students.

2. Objective:

The main objective of introducing this syllabus will acquire the students about basics of chemistry which is highly essential for a student to read chemistry more.

**Academic Year : 2023-24**

Limits and continuity-Concepts of continuity - Derivatives of a function - Differentiation rules - Derivatives of trigonometric function.

Chain rule - Techniques of differentiation - Total and partial derivatives.

Theory of equations - Relation between roots and coefficients-Expressions- Equations and factors

#### **IV. Integral Calculus**

Applications of integration - Definite and indefinite integrals - Proper and improper integrals-

Techniques of integration.

Integration by substitution - Integration by parts - Bernaulli's formula Integration by using partial fractions.

#### **V. Differential Equations**

ODE-PDE-Applications of ODE & PDE-Formation of ODE & PDE Order Degree Need of differential equations & importance.

Linear & non linear - Homogeneous & non homogeneous equations. Relation between constant coefficients & variable coefficients.

#### **COURSE OUTCOME:**

1. Students will recognize problem solving techniques appropriate to a given situation.
2. Including the development of mathematical models, the identification of assumptions.  
the understanding of the limitations of models.
3. The use of both graphical and numerical methods.

**Lectures Minimum 06 Lectures per Unit**

**Total Lectures - 30**

BRIDGE COURSE: MICROBIOLOGY  
B.Sc. FIRST YEAR

## **Bridge Course: Microbiology**

### **Introduction:**

The essential as to Vestment higher secondary level Subjects are necessary to understand the subject at are use and this will lead to better appreciation of the subject education. This case is designed for First Year B.Sc. Microbiology learners, to be completed in ten hours. On the success studied accomplish of bridge course learners will be awarded with certificate of course.

The topics prescribed in the syllabus emphasis on need of Microbiology litrency in the society, Importance of microbiology in daily life, general introduction to the misrvubial World covering basic concepts and types of micronations to the beer section of syllabus, different streams of nice shininge will be taught to create mareness about sype of microbiology. This course will til the gup of subject knowledge between higher saundry level and ondergrudune studies.

### **Objectives of the Course:**

1. To create awareness about scope of microbiology and carrier opportunities
2. To stimulate interest curiosity microbial science.  
To increment studies motivation to learn science

### **Course outcome:**

1. Stimulating interest and curiosity in Microbiology will increase student motivation to learn applied areas of microbiology.
2. Learners will develop interest in subject of Microbiology it  
Will also be useful to fill the gap.

Program objectives:-

- To introduce student the basic functioning of operating system as resource manager and its silent feature .
- Also the study about process state, scheduling , memory and I/O management technique.
- to understand the concepts and significance of the Basic c programing , c ++ , history of java.
- to understand the laws and concepts of computer science.
- to apply the theories learnt and the skills acquired .

After board examinations many students from non arts or non Political Science background opt for Political Science Honors. These students are entirely unacquainted of the basic fundamental principles of Political Science, thus to give them an idea of what political science is essentially all about, Department of Political Science offers Bridge course for them.

**Objective**

For a student of Political Science it is expected to know the significance of constitution for a country, and what the different kinds of governments are, what are the organs of government, what kind of functions these organs perform, what rights are assured by constitution of India to its citizens. As the government at the centre cannot reach to the bottom level there is important role for the local bodies to play as well. To understand the political system that prevailed in India in the past, it makes sense to study the ancient political thought, in the same way study of modern Indian political thought has its own role to play in giving us an idea of the change Indian society has passed through and what is the current status of things. Political ideologies like liberalism, Marxism, Socialism etc. put to the fore a scheme of idealistic political system that should be brought into being and has its own positive and negative aspect. To give students a grip over the subject it is also important to give them an idea of the changes in world order from bipolar to unipolar to multipolar world, and the developments at both the regional and global levels that have emerged to challenge world peace and order.

**Outcomes :**

1. Students will exhibit acquaintance of basic terms, concepts and principles of Political Science
2. It will help the students to advance their scholarly skills necessary for advancement in the course.
3. It will facilitate the learners to interpret comprehensively and to understand minutely the political literature.
4. Students will understand the significance of studying Political Science Theories and the challenges which they will face through their graduation.

## **INTRODUCTION:**

'Basics of Accounting for Beginners' Course introduces to information describing the financial resources, obligations, and activities of an economic entity. The term financial position is used to describe an entity's financial resources and obligations at one point in time, and the term results of operations is used to describe its financial activities during the year.

Financial Accounting information is designed primarily to assist investors and creditors in deciding where to place their scarce investment resources. Such decisions are important to society, as they determine which industries and companies and even countries will receive the financial resources necessary for growth, and which will not. Many other decision makers also make use of financial accounting information. A company's manager and employees constantly need such information in order to run and control business operations.

All types of organizations and also individuals develop and use financial accounting information in conducting their daily activities. But the concepts of financial accounting are most highly developed and clearly defined in the business world. Therefore, this course focuses upon financial accounting information relating to profit-oriented business organizations.

This graduate course introduces the basic concepts and principles of accounting for preparing the financial statements such as income statement (financial performance) and balance sheet (financial position). The course focuses on detailed understanding to the beginners of accounting information system, accounting concepts, accounting principles, accounting cycle, recording of transactions, and financial statement concepts.

## **LEARNING GOALS AND OBJECTIVES:**

### **Goals:**

1. This course will enable the students to combine practice and theoretical knowledge of financial accounting.
2. The students of this course will be active learners and develop awareness of emerging trends in financial accounting,
3. The course will provide decision making skills to the students in the financial analysis context,
4. The students of this course will have the ability to identify and analyze financial accounting problems and opportunities in real life situations.

### **Objectives:**

The objective of this course is to introduce problems of financial accounting such as measuring and reporting issues related to assets and liabilities and preparing the financial statements. Students are expected to gain the ability of using accounting information as a tool in applying solutions for managerial problems, evaluating the financial performance, and interpreting the financial structure.

The term financial position is used to describe an entity's financial resources and obligations at one point in time, and the term results of operations is used to describe its financial activities during the year.

Financial Accounting information is designed primarily to assist investors and creditors in deciding where to place their scarce investment resources. Such decisions are important to society, as they determine which industries and companies and even countries will receive the financial resources necessary for growth, and which will not. Many other decision makers also make use of financial accounting information. A company's manager and employees constantly need such information in order to run and control business operations.

All types of organizations and also individuals develop and use financial accounting information in conducting their daily activities. But the concepts of financial accounting are most highly developed and clearly defined in the business world. Therefore, this course focuses upon financial accounting information relating to profit-oriented business organizations.

This graduate course introduces the basic concepts and principles of accounting for preparing the financial statements such as income statement (financial performance) and balance sheet (financial position). The course focuses on detailed understanding to the beginners of accounting information system, accounting concepts, accounting principles, accounting cycle, recording of transactions, and financial statement concepts.

## **LEARNING GOALS AND OBJECTIVES:**

### **Goals:**

1. This course will enable the students to combine practice and theoretical knowledge of financial accounting.
2. The students of this course will be active learners and develop awareness of emerging trends in financial accounting,
3. The course will provide decision making skills to the students in the financial analysis context,
4. The students of this course will have the ability to identify and analyze financial accounting problems and opportunities in real life situations.

### **Objectives:**

The objective of this course is to introduce problems of financial accounting such as measuring and reporting issues related to assets and liabilities and preparing the financial statements. Students are expected to gain the ability of using accounting information as a tool in applying solutions for managerial problems, evaluating the financial performance, and interpreting the financial structure.

**Unit-1** Mechanics : newton's law of gravitation, gravitational field ,gravitational potentials ,gravitational potential of mass , compound pendulum.

**Unit-2** Elasticity : introduction, stress and strain , hooks law , young's modulus bulk modulus , twisting couple.

**Unit-3** Viscosity : introduction. Concept of viscous force and viscosity, coefficient of viscosity , equation of continuity , energy of liquid in motion

**Unit-4** Thermodynamics : thermodynamics laws, flow of heat, gas equation, transport phenomenon - viscosity, mass, momentum, mean free path.

**Lectures Minimum 06 Lectures per Unit**

**Total Lectures - 30**

**Recommended Reading :**

1. Elements Of Properties Of Matter- T.S. Mathur
2. Physics For Degree Students – C.L. Arora
3. Heat And Thermodynamics And Statistical Physics – Brijlal P.S.Heme
4. Textbook Of Heat And Thermodynamics- -C.L. Arora

**Bridge Course**

With a view to enhance the comprehension in subjects we frame a bridge course to first semester B.A programme students. The essentials and fundamentals of Higher Secondary level subjects are necessary to understand the subject at an ease and this will lead to a better appreciation of the subject.

**Objective**

The bridge course aims to act as a buffer for the new entrants with an objective to provide adequate time for the transition to hardcore of degree courses. This gives them a breather, to prepare themselves before the onset of courses for first year degree programme. During this interaction of five hours with the faculty and their classmates the students will be equipped with the knowledge and the confidence needed to take on bigger challenges in future.
